

## **Video Transcript for Kimbalie Constant, Programme Manager, Department of Social Policy, Research and Planning, Ministry of Social Transformation**

0:00

My name is Kimbalie Constant.

0:02

I am attached to Ministry of Social Transformation, Social Policy and Research and Planning Division.

0:10

These are transformation for us.

0:12

We're trying to eliminate the use of paper and more into technology, technological error in terms of kind of having the data going into the field.

0:23

And my task was to go into the field, collect the data from vulnerable persons that we know for most vulnerable persons and I equip all, they're not financially stable in terms of the category data.

0:40

So we go into the tier, the category comes data from the vulnerable persons and we analyze the data and this data can be used to create programs for vulnerable persons and also assist them in creating a better life for them in the in the field.

1:02

We actually utilize Cobo toolbox, which is the open source device that we utilize within the field.

1:12

Cobo Toolbox can be used to capture the information without using Internet in the field.

1:22

But once we collect the information from the household or the beneficiary, when we actually get Internet, we will upload the information to the database and after the database we will flag all the errors in the database.

1:40

We flag all the errors that we did not see or see or we did not see in the system.

1:51

You will flag people dates and also we conquer those information as soon as possible and we can utilize or we can see what's going on in the system.

2:05

No matter where, where, which type of material we are, we can see what's going on.

2:11

Or if we we see an error in the system, we can call the person that's responsible for that change and they will change.

2:18

For me, before we were the border guardian was responsible for like the data and they use the paper business system in terms of piling.

2:30

And you know, all pilot can be sometimes the stimulus in terms of you going into a pack of the cabinet looking for various facts.

2:41

And that will take off the match time in terms of target machine.

2:45

And you can have a person who did for you know, really one of the persons because of the assistant assistance and the beneficiary.

2:57

Now it actually assists them primarily because the system allows us to because in our people ways, they don't have to go up on their IDs.

3:07

They don't have to go and utilize the the limited resource that they have to do a number of stuff.

3:15

We as the, as the agency or our social policy, we go to them, we go extract the information from them.

3:25

We, we collect the information from them door to door so they don't have to pay transportation from the information.

3:34

When we get back to the office, we can contact them, utilize the information we receive, contact them directly and ask them for the information and put that into the system.

3:45

So it's talking about different for both parties.
